Pocket. Then, we can study the methods of induction and deduction.

In this context, it is evident that the system of the philosophers depends on the following principles:

1. The principle of identity: Every entity is identical with itself.
2. The principle of contradiction: A proposition and its negation cannot both be true.
3. The principle of the excluded middle: Every proposition is either true or false.

Thus, the system of the philosophers is based on these principles, which are foundational to logical reasoning.
